

Art club final reflection

ahaan shokeen

2026-05-05

1. We developed the ATL skill of collaboration, because we collaborated delightfully, exemplifying our delight for art. This, by the way, is *not* a random text dump. This is really me! It's me, a. shokeen! We collaborate through our amazing collaboration powers! It is very fun!

2.

$$\gamma = \frac{1}{\sqrt{1 - \frac{v^2}{c^2}}} \quad (1)$$

idk i just added this to prove to siddhartha that L^AT_EX is the best and google docs is bad anyway my style has gone from kind of cliché and normal bad realistic art, but now I prefer minimalism because it's cool :)

3. I've improved on my linework and programming skills, because I've had to program art — my final piece was literally programmed with a python script because it needed to go through absurd Collatz sequences and convert those numbers to colours, which is very annoying to do by hand.
4. I found fabric the most challenging medium. *I HATE FABRIC*. Paint? seeps right through. *ANYTHING AT ALL??* seeps right through AAAA ITS stupid and i dont like it. also, this is by far, the least professional LATEX document I've ever made.
5. next year, please teach us Processing. It's a programming language designed for art, and I think it'll be cool to learn how to algorithmically make art and all of that cool stuff YAYAYAYAYYAYAYYAYAYYYAYYYAYYY
